For 2005 and 2007, Canadian Community Health Survey, Indicator Profile, for Canada, Provinces and Health Regions, Cansim Table 105-0502.

Note: Data by CMA are not available for 2005 and 2007. Where there are data for more than one health region within a CMA, estimates for the CMA were population weighted using the 2005 health region populations. This was done for Montreal, Toronto and Vancouver. When there was only one health region associated with the CMA, we recommend using the health region data even though the health region is often larger than the CMA.

Note: More information on smoking for CMAs in 2003 is available in Appendix Table III-5.

Note: Population aged 12 and over who reported being a current smoker (daily or occasional). Daily smokers refers to those who reported smoking cigarettes every day. Occasional smokers refers to those who reported smoking cigarettes occasionally. This includes former daily smokers who now smoke occasionally.

Note: Oakville is under the Halton Regional Health Unit
